FOIL DECOR

DIGITAL FOILING MACHINE

- Replaces traditional hot stamping process and reduces the direct and indirect costs of printing; thus, gives same embossed effect as traditional foil print.
- Eliminates costly set-up time, as well as the dies used in conventional foil printing methods.
- Implement cost-effective solutions for short, medium and personalized runs.
- Easy-to-use, user friendly interface.
- PID temp Controller
- Manual pressure adjustment full statement point.
- Suction feeder (Optional)

OUR INFRASTRUCTURE

- Ours is a well equipped manufacturing unit laced with the latest facilities & technical expertise.
- Our production process is first worked out on computer, where the design is simulated & virtually operated & then brought out for manufacturing precise equipments with zero defects.
- Our raw material is sourced from trustworthy premium sources to maintain high manufacturing standards, durability & optimum functionality.
- Our company management is particular about standard & special safety measures in the workshop & a hygienic work environment for our staff.

— OUR COMMITMENT —

- We are driven by our need to fulfill the growing needs of our customers & their satisfaction is our reward.
- We strive towards technically making possible the creative demands of the graphic industry, quality control & enhancement by maintaining international standards.
- We are committed to adding value to your printing facilities

Why Us?

Great Experience

Years of Expertise with client base globally.

Low Maintenance

Our machines are of low maintenance cost and zero breakdown. Built-in diagnostic system & fitted with easy removable & replaceable parts.

High Value for Money

Offering Close Supervision during installation of machines plus an additional 12 months post sales support.

Wide Service Network

Wide service network in Banglore, Delhi, Chennai & Hyderabad.
